1. A basis for a set of FD's  $F$  is any set  $G$  of FD's whose closure is the same as the closure of  $F$ . That is, exactly the same FD's follow from  $F$  as from  $G$ . In addition, a basis must consist of a minimal set of nontrivial FD's. Suppose we have a relation  $R(W, M, X, Y, Z)$  with FD's  $W \rightarrow M, M \rightarrow X, X \rightarrow Y, Y \rightarrow Z, Z \rightarrow W$ . Suppose we project  $R$  onto attributes  $WMXY$ . Describe all the bases for the set of FD's that hold in  $WMXY$ . Given a set of FD's, select statements that correctly explain if the set is a basis or not.
  - a)  $Y \rightarrow W, W \rightarrow X$ : a basis
  - b)  $W \rightarrow M, M \rightarrow X, X \rightarrow W, X \rightarrow Y, Y \rightarrow X$ : NOT a basis
  - c)  $W \rightarrow M, M \rightarrow Y, X \rightarrow Y, Y \rightarrow W, Y \rightarrow X$ : a basis
  - d)  $W \rightarrow X, W \rightarrow Y, X \rightarrow Y, Y \rightarrow X, M \rightarrow X, M \rightarrow Y$ : a basis

Answer submitted: **c)**

You have answered the question correctly.

2. Determine the keys and superkeys of the relation  $R(MNOPST)$  with FD's:  $NS \rightarrow T, MNO \rightarrow P, NO \rightarrow T, MPST \rightarrow N$ . Then, demonstrate your knowledge by selecting the true statement from the list below. Each statement must include all the possible values.
  - a) Superkeys: MOPS, MNPST
  - b) Keys: MNOT, MNOPS, MNOST
  - c) Superkeys: MNOP, NST, MOPT
  - d) Superkeys that are not keys: MNOPST, MNOPS, MNOST

Answer submitted: **d)**

You have answered the question correctly.

3. Which of the following relations is in Third Normal Form (3NF)?
- R(VWXY) FD's:  $V \rightarrow W$ ;  $V \rightarrow X$ ;  $WX \rightarrow Y$
  - R(VWXYZ) FD's:  $V \rightarrow WX$ ;  $Z \rightarrow VY$ ;  $W \rightarrow Z$
  - R(VWXY) FD's:  $X \rightarrow W$ ;  $V \rightarrow Y$
  - R(VWXY) FD's:  $V \rightarrow Y$ ;  $Y \rightarrow X$ ;  $Y \rightarrow W$

Answer submitted: **b)**

You have answered the question correctly.

4. Suppose relation R(A,B,C,D) has the tuples:

A	B	C	D
a	1	4	e
b	2	10	e
c	7	6	f
a	3	19	e

And the relation S(F, G, H) has tuples:

F	G	H
b	15	21
b	4	5
c	7	2
b	5	4
a	20	11
d	6	3
b	17	12

Which of the following tuples is in the theta-join of R and S with the condition  $A = F$  AND  $C < G$  AND  $(D = 'e' \text{ OR } D = 'f')$  AND  $(A = 'a' \text{ OR } A = 'b')$  AND  $G > H$ ?

- (a, 3, 19, e, a, 20, 11)
- (a, 1, 4, e, b, 17, 12)
- (b, 2, 10, e, b, 4, 5)
- (b, 2, 10, e, b, 5, 4)

Answer submitted: **a)**

You have answered the question correctly.

5. Let the relation A(MNOPQRST) satisfy the following functional dependencies:  $N \rightarrow P$ ,  $MO \rightarrow Q$ ,  $RS \rightarrow T$ ,  $Q \rightarrow S$ ,  $OP \rightarrow M$ ,  $PT \rightarrow R$ . Which of the following FD's is also guaranteed to be satisfied by A? Recall that an FD of the form  $X \rightarrow BC$ , where X is a set of attributes and where each of B and C is an attribute, is actually two FDs  $X \rightarrow B$  and  $X \rightarrow C$ . We say that an FD  $X \rightarrow BC$  is guaranteed to be satisfied by a relation schema if and only if

each of  $X \rightarrow B$  and  $X \rightarrow C$  is guaranteed to be satisfied by this relation schema.

- a)  $NQS \rightarrow PT$
- b)  $RST \rightarrow MP$
- c)  $PQR \rightarrow ST$
- d)  $MRT \rightarrow NO$

Answer submitted: **c)**

You have answered the question correctly.

6. Which of the following relations is correctly decomposed into the minimal number of relations that are collectively in BCNF (BoyceCodd Normal Form)?
- a) R(ABCD) FD's:  $AB \rightarrow D$ ;  $D \rightarrow C$  into R1(CD), R2(ABC)
  - b) R(ABCD) FD's:  $A \rightarrow BD$ ;  $D \rightarrow C$  into R1(ABD), R2(CD)
  - c) R(ABCD) FD's:  $A \rightarrow B$ ;  $A \rightarrow C$ ;  $D \rightarrow A$  into R1(AB), R2(AC), R3(DA)
  - d) R(ABCDE) FD's:  $B \rightarrow CD$ ;  $A \rightarrow E$  into R1(ABCDE), R2(AE)

Answer submitted: **b)**

You have answered the question correctly.

7. Which of the following relations is in BoyceCodd Normal Form (BCNF)?
- a) R(LMNO) FD's:  $LN \rightarrow M$ ;  $MO \rightarrow L$ ;  $MO \rightarrow N$ ;  $LM \rightarrow O$
  - b) R(LMNO) FD's:  $MNO \rightarrow L$ ;  $LNO \rightarrow M$ ;  $M \rightarrow L$
  - c) R(LMNOP) FD's:  $LM \rightarrow P$ ;  $N \rightarrow O$ ;  $MP \rightarrow N$
  - d) R(LMNOP) FD's:  $L \rightarrow P$ ;  $M \rightarrow OP$ ;  $OP \rightarrow N$ ;  $P \rightarrow O$

Answer submitted: **a)**

You have answered the question correctly.
